Description

The EFS106-AUX-W series high bay sensor kits are optimized for Luminaire Level Lighting Control (LLLC) applications, particularly in outdoor environments. Each kit includes a sensor, lens, receptacle, and extension accessory in a single package. The sensors integrate daylight harvesting, passive infrared (PIR) motion detection, and long-range antennas within a UV-resistant black nylon housing. Designed for plug-and-play installation in linear and UFO high bay luminaires, these sensors utilize provided WSC01-AUX and WSC03-AUX accessories for easy mounting. Featuring the advanced **AlgoH²** algorithm, they ensure accurate detection in high bay applications up to 40 feet while minimizing false triggers, enhancing overall system efficiency and reliability.
